

## USAGE

Set "chance of ring material" to 0 to prevent a ring of debris being generated.

The Layers checkbox, if enabled, will create concentric layers of material in the planetoid with each layer a block of the type in the list (outward is left, inward is right)

Crescent checkbox, if checked, carves a random half of the world away, leaving a crescent of material

Swiss cheese craters out the interior of the world, instead of the surface, making it full of caves.

Layer function, 100% chance:

Swiss Cheese option:
