## Block Schematic Swapper

posted Jun 10, 2013, 10:36 AM by Adrian Brightmoore [ updated Aug 22, 2013, 9:28 PM ]

This is a filter that searches for, and then replaces the blocks of a certain type within your selection box with a schematic file you specify. It is like a 'search/replace' for schematic placement, allowing you to pull in NBT data as part of the import.

Here is a tutorial video explaining how to code the filter as well as demonstrating the function:

### Creating the Block Schematic Swapper filter
