CLONE BLOCK TYPE

posted Oct 11, 2015, 6:38 PM by Adrian Brightmoore

This filter clones blocks of the 4 types you select in the direction you decided by x/y/z offsets. This filter will ONLY read and write blocks in the selection area, so make the area big enough to handle the copied blocks.

Requested by @Dragnoz

[CloneBlockType_v1.py](#) (5k)
